### List of Services

- **Customized Employment Services** is a set of services that uses an approach called Discovery to identify the strengths of an individual in community settings. The role of the service provider in Customized Employment is to facilitate customizing a job for the individual matching those strengths to a business's needs. Customized Employment is an option when typical supported employment strategies have not been successful, or when customized employment strategies may more successfully meet a consumer's individualized support needs.
- **Individualized Placement and Support (IPS) Services** is an evidence-based model of Supported Employment services for consumers with the most significant disabilities (Category 1) who have a primary diagnosis of serious and persistent mental illness or substance use disorders and need long-term support to maintain a job. IPS services are provided in a working alliance with mental health services and include planning for employment, job development, job placement, on-the-job support, transition to long-term support, and successful employment. To build ongoing collaboration, DVR attendance at meetings and continued use of information from the IPS Employment Center is encouraged, including resources on implementation of the IPS model, agency guidance, fidelity reviews and recommendations, policies, and regulations.
- **Internship/Temporary Work (I/TW)** is a time-limited, paid work experience. This service is designed to provide DVR consumers in-depth knowledge of day-to-day work requirements in a competitive integrated setting. Possible purposes may be to try out a job, determine an appropriate vocational goal, determine needs for rehabilitation technology or job accommodations, assist with work hardening, or develop a current work reference or new skills.
